Pune

## PROFESSIONAL PROFILE

QA Engineer with 3+ years of experience in Manual [Functional] and Automation Testing across Web, Mobile, and API. Strong expertise in Selenium WebDriver (Java), Playwright (TypeScript), Appium, and RestAssured. Well-versed in STLC, SDLC, Agile methodologies, CI/CD pipelines, and end-to-end quality assurance. Proven ability to collaborate with cross-functional teams, interact with clients, and ensure high-quality product delivery.

## EDUCATION DETAILS

APR 2020

BACHELOR OF ENGINEERING

Pune University

## CURRENT ORGANIZATION

MAR 2024 – Current Quality Assurance Engineer | Wheels EMI PVT LTD

JUN 2023 – MAR 2024 Quality Assurance Engineer | THINKBRIDGE SOFTWARE PVT LTD

OCT 2022 – JUN 2023 Associate Test Engineer | TECHSEVIN SOLUTIONS LLP MUMBAI

## PROFILE SUMMARY

## o Work Experience on Manual Testing

- Design & develop test cases based on available **requirement specifications** and verification plans, **execute tests cases** with the help of **TestRail**.
- Good experience on **Ad-Hoc testing, Functional testing, Regression testing, Re-testing, Smoke testing,**
- Good exposure to **Non-functional testing**
  
- Prepare detailed defects report.
- Detecting bugs & classifying them based on **severity, priority.**
- Strong understanding **Test Execution Process, Defect Life Cycle, and Test Plan.**
- Hands on Experience in **Recovery Testing, Compatibility Testing, Globalization Testing and Sanitation Testing.**
- Expertise in performing **Sanity Testing.**
- Used **Postman** for **API testing.**
- Good knowledge of **Software Development life Cycle (SDLC) and Software Testing Life Cycle (STLC).**
- Write **Unix** command to generate log file.
- Have experience in of functionally tested various **Web based & Mobile applications.**
- Work on **Agile Methodology** process in the project.
- Proficient in **writing Test cases** by using test case design technique.
- Good Exposure on **agile scrum,**
- Expertise in test management tool like **JIRA ,TRELLO , CLICKUP** etc.
- If the defect is found, then report it to the developer and fix it.
- Make sure the application is the free defect.
- Send the test report to test lead.
- Created test cases for new product development.
- Used **MySQL** as front-end database utility tool to perform database testing.
- Good experience in **mobile application testing** using **browser stack.**

## o Work Experience on Automation

- Proficient in Core **JAVA Programming**
- Good experienced in **Automation testing** using **Selenium and Playwright** automation tool with programming language **Java and TypeScript.**
- Having a Precise knowledge of **MAVEN, GitHub ,Azure DevOps, Jenkins, Listeners.**
- Excellence in handling **Popups, Drop down and iframe.**
- Good exposure in **TestNG, Annotations, keywords and assertions.**
- Proficiency of creating **POM classes and Test classes** for the framework.
- Selection or identification of test cases for automation from existing test case documentation
- Configure Selenium Test Environment for setup (ex: **Java, Selenium WebDriver and TestNG, etc.**).
- Good experience with **OOPS concepts, Collection framework, Arrays and String Class in JAVA.**
- Skilful with handling Synchronization (**Implicit, Explicit and Fluent waits**).
- Having a knowledge of **Test scripts execution.**
- Doing Peer Review for scripts developed by team mates as per the standards

- followed in the project.
- Proficient in Performed **cross browser testing**.
  - Knowledgeable about **how to take a screenshot of failed test cases and how to execute failed test cases**.
  - Extensively used **TestNG** framework for the development of the Test classes.
  - Good understanding of Build Automation tool i.e. **Maven for Data Driven Framework and BDD Cucumber Framework**.
  - Good familiar with **GitHub, Jenkins, Azure DevOps** knowledge.
  - Expertise in identifying unique web elements using **Xpath**.
  - Superior understanding of Designing and Developing **Test Cases** and Generating **Test Scripts**.
  - Selection or identification of test cases for automation from existing test case documentation.
  - **Test scripts execution**, debugging and fixing the Automation issues.
  - Experienced of **assertions** and **Annotations** in **TestNG** framework.
  - Experience in executing the test scripts in parallel for Firefox and Chrome.
  - Have good understanding of **Data Driven framework** and **BDD Cucumber framework**
  - Expertise in writing **feature** file and **step definition** file
  - Working on Agile (SCRUM) methodology and using **Jira** for defect tracking. Working in conjunction with manual testers to convert manual test cases to automation.
  - Creating, executing the test sets and maintaining the documentation of test results.

---

## TECHNICAL SKILL

- **Automation Tools:** Selenium WebDriver, Playwright, Appium, RestAssured, Postman
- **Programming Languages:** Core Java, TypeScript
- **Frameworks:** TestNG, BDD Cucumber, Data-Driven, POM
- **Testing Types:** Web, Mobile, API, Database, Automation, Integration, Regression, Sanity, Retesting, Performance, Security, End-to-End
- **Test Management & Tracking:** JIRA, TestRail, Trello, ClickUp
- **Build & Version Control:** Maven, GitHub, Azure DevOps, Bitbucket
- **Back End:** SQL, MAGENTO, LARAVEL
- **CI/CD & Performance:** Jenkins, JMeter

---

## PROJECT DETAILS

### Project 1

**Project name : GBL, EV Rental, Finnone (LMS + Collection), Synoriq (LMS + Collection)**

**Client : Bike Bazaar**

**Domain : NBFC**

**Testing Methodology :** Manual Testing (Functional) & Automation Testing (Playwright & Selenium) & Mobile App Automation (Appium), API Automation (RestAssured, Postman), Performance Testing(JMeter), Tello, Bitbucket, Jenkins

**Project Description:**

- Working on Finnone Neo & Synoriq LMS with a strong focus on loan management and collections.
- Involved in the testing of projects such as LMS, M-Collect, Ghar Baitho Loan[GBL], and EV Rental solutions.
- Performed end-to-end functional, Integration, regression, sanity, and Automation testing, for web-based lending applications.
- Executed API testing (manual and automation) to validate loan workflows and integrations.
- Ensured data accuracy, business rule validation, and a seamless customer journey across the loan lifecycle.
- Collaborated closely with business analysts, developers, and stakeholders to improve product quality.

## Project 2

**Project name : gWorks**

**Client : gWorks , USA**

**Domain : City Management**

**Testing Methodology:** Manual Testing (Functional) & Automation Testing (Playwright & Selenium) & Mobile App Automation (Appium), API Automation (RestAssured, Postman), Performance Testing(JMeter), Jira, Testrail, Azure DevOps

**Project Description:**

- Prepared detailed test scenarios, test cases, and test data based on requirements.
- Automated regression test cases using Playwright (TypeScript).
- Developed and maintained BDD Cucumber framework for better test maintenance.
- Conducted API testing using Postman and API automation using Playwright.
- Managed defect reporting and closure in JIRA.
- Participated in QA reviews, sprint retrospectives, and client presentations.

## Project 3

**Project name : YarnBiz**

**Client : Yarnbiz , India**

**Domain : E-COMMERCE**

**Testing Methodology :** Manual Testing (Functional) & Automation Testing (Selenium & Playwright) & Mobile App Automation (Appium), API Automation (RestAssured, Postman), Performance Testing(JMeter), Jira, Testrail, GitHub, Jenkins, SQL

**Project Description:**

YarnBiz is a tech empowered digital platform for trading of yarn. It is an online marketplace for yarn manufacturers to sell their products and manufacturers of fabrics to purchase yarn with maximum privacy and minimum hassle. Our aim is to organize and modernize the Yarn industry by providing ease of business to the industry using technology and modern business practices. YarnBiz platform sprung from the intellect of yarn industry experts who have closely experienced all phases of the industry closely and thus with such intricate understanding of the business, the platform aims to ease the business for the industry. Only tested products with valid certifications are available on our platform, thus the buyer is assured about product quality and the turnaround time is specified keeping the buyer's considerations

in mind. With a wide array of products listed from multiple sellers offering door to door shipment with online tracking of consignment, it is the easiest way to manage your business.

## Project 4

**Project name : Capital Markets Solutions**

**Client : Credit Suisse's, Switzerland**

**Domain : Investment Banking**

**Testing Methodology :** Manual Testing (Functional) & Automation Testing (Selenium & Playwright) & Mobile App Automation (Appium), API Automation (RestAssured, Postman), Performance Testing(JMeter), Jira, Testrail, Bitbucket, Jenkins, SQL

### Project Description:

Credit Suisse offers a wide range of investment banking and capital markets business investment banking solution including advisory services related to acquisitions, divisors and takeover protection strategies, as well as debt and Equity offers. Our clients include leading corporations, financial institutions, financial sponsors and sovereign. To provide advice and design solutions that suit distinctive and dynamic needs. Our capital markets specialists, spanning debt and equity, many of whom have spent decades in the financial services industry, help issuers establish lasting, meaningful dialogue with the broadest possible array of investors.
