

Mr. Patil Ashutosh Dayanand

Senior Software Engineer

(+91) 7666423422 ashupatil9696@gmail.com Pimple Saudagar, Pune, Maharashtra

SUMMARY

I am an experienced Senior Software Engineer with a focus on Automation Testing and Quality Assurance. I possess strong expertise in both manual and automated testing methodologies. With a solid foundation in software development under Agile methodologies, I have a proven track record of delivering high-quality software solutions. I am passionate about enhancing testing processes to improve overall product quality.

KEY ACHIEVEMENTS

Identifying suitable test cases:

Selecting which test scenarios are best suited for automation, typically focusing on repetitive, high-impact, or time-consuming manual tests

Test execution and reporting:

Running automated tests on different environments and generating detailed reports highlighting any failures or issues.

Regression testing effectiveness:

Easily re-running automated tests whenever code changes occur to identify regressions.

Software Deployment Success:

Delivered successful software deployments with zero critical defects

EXPERIENCE

Senior Software Engineer

Capgemini

A global consulting firm that helps companies transform and manage their businesses using technology.

- Around 3 years of Industry experience including internship in Software Testing (Manual & Automation)
- Worked as a Test Engineer under Agile software development methodology
- Strong experience in automating web-based and mobile applications

Pune, Maharashtra

01/2022 - Present

EDUCATION

B.E. in Electrical Engineering

JSPM's Jayawantrao Sawant College of Engineering

Pune, Maharashtra

08/2019 - 06/2022

SKILLS

Agile, Android, Apache POI, Appium, automation testing, Azure, BDD, Chrome, Core Java, cucumber, Eclipse, Firefox, gherkin, Git, Github, HTML, IntelliJ, Java, JIRA, Mac OS, Maven, Quality Assurance, regression testing, Sanity Testing, Scrum, Selenium, selenium web driver, Test Design, test scenarios, TestNG, TOSCA, VS Code, Windows, Xpath, Android Inspector, Perfecto

PROJECTS

BD360H Application

02/2024 - 12/2024

MetLife 360Health is an end-to-end health solution that helps users live a better and healthier life.

- Prepared Test Scenarios, designed Test cases, and reviewed them; chosen Test cases for automation
- Performed Automation Testing using Selenium on web-based applications
- Constructed complex XPath queries to handle dynamic and nested elements
- Involved in BDD framework to develop Cucumber Step Definitions, Scenarios and Features using acceptance criteria
- Executed Test Scripts in batch for Regression or sanity testing
- Enhanced Test cases using Java programming features and TestNG Annotations
- Generated HTML reports and maintained logs of executed scripts
- Involved in Bug Tracking Process using Azure board

UAA Application

05/2023 - 01/2024

Testing of UAA application, a web/mobile-based application to help Financial Associates enroll customers into insurance policies.

- Responsible for Test Design, Test Execution & Defect Reporting using JIRA
- Chosen test cases for automation
- Developed automation scripts for web using MetLife's QE Automation framework and wrote step definitions using Gherkin based features
- Identified page objects by various locators and created page factory classes
- Handled Selenium synchronization issues using explicit & implicit waits
- Worked on Maven build automation tool and used Version Control Tools like Git and GitHub
- Executed Test Scripts in Safari, IE, Mozilla Firefox & Google Chrome
- Participated in scrum meetings to discuss project progress
